SUMMARY STATEMENT

Policy professional and technical researcher with 3+ years of experience in high-security environments at the CIA and FBI. Focused on the intersection of AI assurance, technical governance, and international security. Currently pursuing an MPP at Yale with a research focus on technical CBRN guardrailing, AI upskilling by malicious actors, and great power competition between the US and China.

EDUCATION

Yale University

Master in Public Policy in Global Affairs

New Haven, CT

Aug. 2025 – June 2027

Sciences Po Paris

Stablecoins, DLT, and International Trade (Study Abroad)

- Collaborated with the International Chamber of Commerce (ICC) to develop stablecoin and distributed ledger technology (DLT) frameworks.

Paris, France

March 2026 – April 2026

Dartmouth College

Bachelor of Arts, Quantitative Social Science, Honors

Hanover, NH

Sept. 2018 – June 2022

EXPERIENCE

Centre for the Governance of AI (GovAI)

Summer Research Fellow

London, UK

June 2026 – Aug. 2026

- Conduct technical research on CBRN (Chemical, Biological, Radiological, and Nuclear) dual-use risks in frontier models, developing robust evaluation frameworks to assess and mitigate high-consequence biosecurity threats.
- Analyze the intersection of model alignment and red-teaming protocols to establish technical guardrails against the autonomous generation of hazardous biological and chemical synthesis protocols.
- Synthesize technical safety findings into policy-oriented briefings to inform international governance frameworks and AI safety standards for dual-use capabilities in national security contexts.

Central Intelligence Agency – Directorate of Digital Innovation

Data Scientist – AI/ML Engineer – TS/SCI Full Scope Polygraph

Langley, VA

Oct. 2023 – May 2025

- Implemented AI assurance frameworks and adversarial testing for Mandarin-language models to evaluate model alignment and robustness.
- Built and deployed NLP and computer vision pipelines using Python and PyTorch for mission-critical applications.
- Led cross-functional teams to deliver enterprise AI features under strict security and performance requirements.
- Designed scalable ETL pipelines across multilingual datasets using Kubernetes and Docker.

Federal Bureau of Investigation – Resource Planning Office

Data Analyst – Resource Analysis – TS/SCI Full Scope Polygraph

Washington, D.C.

Aug. 2022 – Sept. 2023

- Engineered SQL-based pipelines to process personnel data for 30,000+ employees, reducing reporting latency.
- Built interactive data visualizations in R and Python to inform multi-million-dollar budget decisions.
- Innovated projects to process massive data volumes for FBI positions and quarterly personnel expense requests.

LEADERSHIP AND ACADEMIC RESEARCH

OpenAI

Research Assistant (Collaborator)

San Francisco, CA (Remote)

May 2026 – Present

- Co-authoring a policy research paper with Ziad Reslan and Kim Malfacini of OpenAI evaluating global frameworks for advanced AI access and hardware/compute governance.
- Develop structural outlines and policy recommendations addressing the trade-offs between open-source model dissemination, technical verification mechanisms, and international safety guardrails.

Council on Foreign Relations

Graduate Research Assistant to Adjunct Senior Fellow Gordon Goldstein

New York City, NY (Remote)

May 2026 – Present

- Conduct targeted literature reviews and structural analyses for a forthcoming Rockefeller Brothers Fund/Council on Foreign Relations book project on artificial intelligence and international security by Gordon Goldstein.
- Investigate geopolitically critical facets of US-China technology competition, evaluating the strategic implications of advanced computing capabilities on regional stability and international safety frameworks.

Yale Journal of International Affairs (YJIA)

Editor-in-Chief

New Haven, CT

Oct. 2025 – Present

- Spearheaded outreach and management for the 2025-2026 season, securing a record 154+ responses.
 - Supervised the review of technical and China-focused submissions, focusing high-level review on record-breaking turnout.
 - Communicated critical publication decisions and standards to the leadership team and staff reviewers.
- Yale Jackson School of Global Affairs**
Teaching Fellow and Course Assistant

New Haven, CT
Aug. 2025 – Present
- Facilitate intelligence roleplay and technical simulations for “Intelligence, Espionage, and American Foreign Policy” with Prof. Ted Wittenstein.
 - Manage student groups and logistical operations for “Managing the Clean Energy Transition” with Amb. Paul Simons.
 - Mentor students on entering government and intelligence careers, including proctoring and curriculum support.

PUBLICATIONS

- “Geospatial AI Frameworks for Infrastructure Monitoring”** | *TechNatSec Journal*
• National winner for paper competition with the MIT–Harvard Technology & National Security Conference.
• Applied multi-modal satellite imagery and Computer Vision (CNNs) to identify structural damage in conflict zones.
• Fused GeoAI outputs with ACLED and WFP telemetry to generate predictive risk indicators for civilian harm.
- “Vertical integration of rare Earth elements for US autonomous dominion”** | *CNAS*
• National winner in the Center for a New American Security (CNAS) Pathfinder research competition.
- Feb. 2026
Nov. 2025

TECHNICAL SKILLS

Programming Languages: C++, Java, Python, R, SQL, LaTeX
Libraries: Tensorflow, Pytorch, Scikit-learn, XGBoost, Pandas, NumPy, SpaCy, tidyxl
Databases/Engineering: Elasticsearch, Kafka, MySQL, PostgreSQL, Kubernetes, Triton, Docker
AI Tools: Hugging Face Transformers, YOLOv8, Detectron2, MMDetection, LangChain, NLTK
Spoken Languages: Mandarin Chinese (Fluent), Russian (Proficient)

EXTRACURRICULARS AND AWARDS

- Technical AI Safety Certificate** — *Bluedot Impact*
- TechnatSec Symposium Finalist** — *Harvard Belfer Center and MIT Sloan*
- CNAS Pathfinder Essay National Winner** — *Center for a New American Security*
- Asian Pacific American Organization Directorate Representative** — *CIA*
- Pat Roberts Intelligence Scholars Program** — *CIA*
- Intermediate Data Exploitation Certification** — *FBI*
- May. 2026
Mar. 2026
Nov. 2025
Oct. 2024
June 2024
Jan. 2023
